

IN-WARRANTY REPAIRS

All rebuilt timers are warranted for 6 months from date of installation. Complete the form below to submit a proper request for in-warranty repairs.

Warranty will be void if:

1. Seals are broken
2. Timer has been dropped, water damage, electrical short, turned backwards, wire cut or if parts are missing, oily, tampered with or mishandled.
3. Damage for any reason, including during return shipping.
4. Please detail why you feel the timer is not functioning. Please **DO NOT USE** the word **DEFECTIVE** as your sole reason for repair.
5. Please fill out one sheet per timer

Date on Timer: _____

Date Installed: _____

Describe the Problem: _____

This assembly is a precise part in delicate appliance. It has been rebuilt by a skilled technician and tested on expensive equipment.

A timers function is to provide voltage to a proper component of a machine, washer or dryer at the proper time. It is necessary therefore, to determine when a machine failure occurs if it is the fault of the timer itself or some other component malfunction.
